

Project & Programme Management

The Palmarium Project and Programme Management team are highly skilled individuals who have all spent a minimum of 8 years in management and consultancy positions in industry and/or consultancy based organisations. We operate a "right first time" philosophy and ensure that this ideal permeates through all aspects of our customer's projects.

We work in close partnership with your business and, where appropriate, third parties. We will help you to establish your current operating position, define the point where the project or programme needs to drive the organisation to, and then plan the path to implement your goals. All utilising your current version of M3 or as part of an upgrade or enhancement project.

Range of Services

Our track record in delivering short term immediate projects and the more complex longer term programmes is impressive. Our skills base allows us to manage delivery in key business areas such as ...

- ✓ Discrete and Process Manufacturing
